- *Designed BY law enforcement for tactical use*
- *Propriety Lume Tube Technology*
- *Full Size impact resistant Swiss Movement*
- *Specially designed recessed crown for protection*
- *NTOA Member Tested and Recommended*

## A BACKGROUND IN LAW ENFORCEMENT GOES A LONG WAY

Smith & Bradley lead designer Jerommie Smith is no weekend warrior. He has been in law enforcement for 17 years and helped to establish the Champaign County K9 Unit. A firearms instructor, canine handler, and patrol officer, Jerommie has lived his designs.

Jerommie designed every element of the Sans-13 to be useful in the field for tactical operators. In fact, all of Smith & Bradley's tactical designs are designed and built as tools rather than mere watches.

The trademark of the Sans-13 is the proprietary Lume

Tube technology that Smith developed after years of problems with other watches in a low light situations. Simply put, in a low-light setting, only you should see your watch. Many other "tactical" watches are blazingly bright to the extent that the lume itself could give away position. Culling from years of Metro SWAT experience Smith fought for years to find ways to solve the lume problem—finally deciding to simply create his own watch.

Lume Tube technology is not the only dedicated tactical aspect of the Sans-13. Both

the PVD and raw stainless watches are made from 316 L Stainless steel, and feature anti-reflective sapphire crystal. The 90 click bezel is larger for uses with or without gloves, and the natural rubber band provides more comfort and durability than cheap silicone substitutes.

Finally, Smith & Bradley backs each watch with a no questions asked one year warranty.

- Size: 43mm
- Swiss Ronda 6003.D 4 Jewel full-size movement
- Water Resistant to 200 meters
- PVD coated or raw 316L stainless steel case
