

XR1

COMPACT RECHARGEABLE HANDGUN LIGHT

800 LUMENS

30 MINS

245 METERS

REFLECTOR

RECHARGEABLE

DESCRIPTION

The SureFire XR1 combines brilliant LED white light in a compact, durable and reliable unit that offers the convenience of environmentally friendly rechargeability.

The XR1's recoil-proof LEDs pump out 800 lumens of light downrange, while SureFire's parabolic reflector technology ensures a smooth, rounded beam that is for ideal situational awareness. The XR1's quick-detach lithium polymer battery provides easy recharging without removing the light from the weapon. Simply remove the B13 battery and charge it via the included CH22 battery charging cradle.

Weighing just 2.2 ounces, the XR1's Mil-Spec hard-anodized aerospace aluminum body is small yet durable enough for everyday carry. Its new rail mount features four points of contact for an added measure of redundancy and security when mounted to a weapon.

The XR1's ambidextrous switching provides quick and easy momentary- and constant-on activation options. Momentary-on activation is achieved by placing your support hand thumb on top of either of the XR1's rear downward-activated switches and pushing down. The XR1 will stay in momentary mode for as long as either toggle switch is depressed and held in the on position beyond a fraction of a second. Constant-on activation is achieved by quickly tapping either one of the momentary-on switches. To turn off the constant-on mode, quickly touch and release either toggle switch. It can also be achieved by using your support hand to push the center crossbar switch from left to right. Durable enough for everyday carry, the XR1 sets a new standard in ultra-compact WeaponLights.

FEATURES

- Lightweight and ultra-compact; ideal for concealed-carry use
- Securely attaches to most Universal-rail-equipped handguns
- Integrated ambidextrous momentary- and constant-on switching
- Gasket sealed; weatherproof

SPECIFICATIONS	XR1-A	
	OUTPUT	800 lumens
	RUNTIME	30 minutes
	PEAK BEAM INTENSITY	15,000 candela
	DISTANCE	245 meters
	CONSTRUCTION	Aluminum
	FINISH	Mil-Spec Hard Anodized
	WEIGHT (w/batteries)	2.65 oz (75 g)
	LENGTH	2.46 in (6.25 cm)
	BATTERIES	Integrated rechargeable Lithium Polymer
	SWITCHING	Ambidextrous momentary / Ambidextrous toggle tap

All performance claims tested to ANSI/NEMA FL1-2019 Standard.
